

Edebits

Animation HD

(26 x 13 min.)

Edebits is a “green”series with ecological values, set in a scientific base in the Antarctica, where thanks to the incredible adventures of a little girl and her 5 bit friends -the Edebits-we are going to discover the frozen continent and learn about the respect to the environment, through themes like the climate change, the oil pollution, the seal hunting, etc.

The **Edebits** will take us inside their technological world, where they help Bet in all her adventures, full of action, friendship, solidarity, teamwork and lots of humor.

Edebits introduces children into the world of technology. It also makes them aware of environmental issues and how we can help to solve these problems. 2 inputs: ECOLOGY AND TECHNOLOGY

- Educative entertainment property
- Main values: ecology, respect for the environment and technology.
- Target: 4-8 years-old (core target)
- Preschool (secondary target)
